nevigate
Connecting You Globally

INTERNET ACCESS SERVICES

Nevigate Communications (Nevigate) provides customers with extensive, reliable and cost effective global Internet Access (IA) connectivity solutions to meet evolving business requirements and needs.

Internet Access Services are used either as an enabler to power business applications through the public internet or as a cost-effective backup solution.

WHY CHOOSE NEVIGATE FOR INTERNET ACCESS SERVICES

- Enjoy carrier-grade services with seamless operations management.

- Reliable, highly available services.

- Stringent end-to-end customer management process cycles starting from pre-sales, sales, provisioning, to post-sales support.

- Flexible provision of access technologies based on customers' requirements.

- Improved resource utilisation, network visibility and service performance.

OUR DIFFERENTIATION

- Gain access to a global network covering more than 150 countries and growing.

- Our virtual network overlay architecture delivers true One-Stop-Shop (OSS) experience, allowing us to build and deliver global connectivity services to any global carrier customer.

- Nevigate's Single-Point-of-Contact platform provides our customers with a simplified process on network management and fault management.

- Lowered cost of ownership by utilizing Nevigate's extensive network of local suppliers/PTTs.

- Availability of single commercial arrangements.

Contact Nevigate today for a non-obligatory consultation.
